About the science and it's use:

Beth Burritt
BEHAVE Program Outreach Director
Utah State University
<http://www.behave.net>
(435)797-3576
beth.burritt@usu.edu

Beth's quote appears on the back of my book: *"Kathy Voth has done a fantastic job of using behavioral and nutritional principles to develop a low-cost, proven method to teach cows to eat weeds."*

First-Ever Project at Grant-Kohrs Ranch National Historic Site. 2004 - 2005:

Here is a link to an article published November 29, 2009 on the Montana Weed Control Association's web site by the National Park Service regarding the project. It includes a quote from Ben Bobowski on what they found about weed results: <http://www.mtweed.org/library/wp-content/uploads/2009/11/2008-weed-eating-cattle.pdf>

Ben Bobowski is now the Chief of Resources at Rocky Mountain National Park. You can reach him via email at Ben_Bobowski@nps.gov.
